JOB OPPORTUNITY @ 2operate

2operate is seeking experienced software developers / system administrators

2operate is seeking skilled and experienced software developers / system administrators to be part of the development team for our 2solve product suite. 2solve is an Operations Support System (OSS) / network management platform currently being used by customers in 10 countries on 3 continents, and we seek new employees to take part in developing the next generation which will be deployed for both land-based mobile networks and satellite networks.

Since we are seeking more than one employee, your background could be from software development, solution deployment, or customer support.

We are looking for full-time employees for our office at Niels Jernes Vej 10, 9220 Aalborg.

Your responsibility

With reference to our CEO, Christian Ingerslev, you will be part of a dedicated team that maintain and develop our product suite, 2solve, as well as take part in international R&D collaboration projects. You will be involved in all phases of development projects, including research, analysis, design, testing, operations and support. In many cases you will be interacting directly with the customer or partner, and therefore it is important that you are able to communicate in English (both speaking and writing).

2solve is using a wide variety of technologies, tools and methods such as:

Java - Spring - GWT - Google Maps - Maven - MySQL - NoSQL - Apache Tomcat - REST - HTML - XML - JSON - Scrum - SVN - Eclipse - Jira – PHP

For applying this position, you must be experienced in some of these.

You are offered

A position in an innovative, global, and successful company, where every day brings new challenges and exciting initiatives. We offer plenty of new opportunities – of both personal and professional character. The company culture is based on a dynamic and informal atmosphere with focus on execution to the benefit of our customer. Company values are: Respect and trust and Dare to be different. At 2operate you become part of a skilled team of colleagues where the common goal is to position 2operate as the leading provider of intelligent OSS solutions. You will often get the chance to travel and meet people from all over the world.

Your Qualifications

Your background and education must be within software and/or telecommunications, where the main thing is your experience and your results, as well as your personality. The following skills will be prioritized:

- In depth experience with Java development

- Experience from Mobile Telecom OSS

- Experience with agile development methods, web applications, relational databases, version control, unit testing

- Positive, outgoing attitude

- The ability to work both individually and in teams, where openness, trust and dialogue are the key words.

- Being able to handle and deliver on multiple tasks even in stressful situations.

- We expect you to be able to speak and write fluently in English.

Since we are seeking more than one employee, your focus could be a more software development, solution deployment, or more customer support.

Something for you?

If you have any questions, please feel free to contact CEO Christian Ingerslev on cis@2operate.com or +45 2070 4128
